What is this product?

Type

Credit Andorra Global Investment SICAV-SIF - Titanium Class D (EUR) Cap is a Partnership limited by shares (société en commandite par actions) organized under the laws of the Grand Duchy of Luxembourg and having the status of a specialized investment fund under Part II of the SIF Law (13 February 2007).

Objectives

The Sub-Fund invests in large range of investment instruments such as money market, Fixed income securities (bonds and loans with a higher return than other fixed income instruments, or structured credit instruments). The Sub-Fund can also invest up to 35% in equity securities and financial derivatives.

Intended investor

The Sub-Fund is intended for well-informed investors who are able to make an informed investment decision based on this document and the Offering Memorandum, and who have a risk appetite consistent with the risk indicator below.

The Sub-Fund may be appropriate for those Investors who seek capital appreciation over the long-term, do not seek regular income and accept the risks associated with this type of investment.

The Sub-Fund has been established for an unlimited period of time and is open-ended.

However, it may be dissolved by the Board of Directors of the Fund if they deem it useful to protect your interest.

Please refer to the Offering Document of the Fund for further details on closure of sub-funds.

What are the risks and what could I get in return?

Risk Indicator

The Recommended Holding Period of the product is 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions will likely impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency than the official currency of the Member State where the Fund is marketed to you, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

You may lose up to the totality of the amount you have invested in the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Performance Scenarios

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR (€)10,000. **The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and may not anticipate any future performance. What you get back will vary depending on how the markets perform and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances and does not take into account the situation where we are not able to pay you.** The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you may get back.

What happens if the Credit Andorrà Global Investment Sicav-Sif - Titanium Class D (EUR) Cap is unable to pay out?

You may face a financial loss if the Fund is unable to return your investment due to poor performance. The Manager as the manufacturer of this product has no obligation itself to pay out since the product design does not contemplate any such payment being made. Any loss you do suffer as a result of actions of the Manager or the Fund is not covered by an investor compensation or a guarantee scheme.

What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does (where applicable). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested minus the total costs (131.46 (€)), which has an annual cost impact of 1.31%.

Cost over time

Investment 10,000€ Scenarios	If you exit after 1 year	If you exit after 3 years	If you exit after 5 years
Total costs	131.46	400.77	675.58
Annual cost impact*	1.31%	1.32%	1.32%

Composition of costs

The table below shows:
