What is this product?

Type

Creand Global Investment SICAV-SIF - Best Managers Value Fund Hedged Class AEH (EUR) Cap is a Public Limited Company (*société anonyme*) organized under the laws of the Grand Duchy of Luxembourg and having the status of a specialized investment fund under Part II of the SIF Law (13 February 2007).

Term

The Fund has no maturity date. Notwithstanding this provision, the Fund may be dissolved at any time by a resolution taken by the general meeting of shareholders.

Objectives

The Sub-Fund aims to achieve long-term capital appreciation with managed risk. It invests in a diverse range of hedge funds and traditional assets through various strategies, including long and short positions. Top-ranked independent managers are selected to manage these funds. The portfolio includes diverse assets like private equity, real estate, equities, commodities, and bonds. The allocation of strategies and managers changes based on micro and macro-economic analysis. Borrowed capital is limited to 15% of net asset value. The Sub-Fund ensures liquidity for redemptions. It uses derivatives for hedging and investment. Sustainability risks are being considered, but a comprehensive policy is in development. The Sub-Fund doesn't adhere to EU criteria for environmentally sustainable activities.

Intended investor

The Sub-Fund is limited to Eligible Investors: Well-Informed Investors and non-Prohibited Investors. Prospective investors must provide required information, documents, and affidavits to demonstrate eligibility. Well-Informed Investors include institutional, professional investors, or those investing at least EUR 125,000, supported by relevant assessments. Directors and managers fall under this category. The Fund may refuse Shares, rights, or redeem Shares held by Prohibited Persons as defined by the Offering Memorandum, seeking indemnification except in cases like inheritance. For this Share Class, the minimum subscription amount is EUR 1,000,000, with subsequent minimum subscription set at EUR 10,000.

What are the risks and what could I get in return?

Risk Indicator

The Recommended Holding Period of the product is 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you. We have classified this Fund as 4 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the Fund's capacity to pay you. **Be aware of currency risk. You will receive payments in a different currency than the official currency of the Member State where the Fund is marketed to you, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** You may lose up to the totality of the amount you have invested in the Fund. This product does not include any protection from future market performance so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Performance Scenarios				
Investment of 10,000 EUR (€)		1 year	3 years	5 years
Stress scenario	What you might get back after costs	8,558.32	7,723.9	6,455.1
	Average return each year	-14.42%	-8.25%	-8.38%
Unfavourable scenario	What you might get back after costs	9,027.02	7,772.3	7,331.7
	Average return each year	-9.73%	-8.06%	-6.02%
Moderate scenario	What you might get back after costs	10,186.77	10,445.8	10,517.7
	Average return each year	1.87%	1.46%	1.01%

	Average return each year	18.90%	11.23%	8.94%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR (€) 10,000. **The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and may not anticipate any future performance. What you get back will vary depending on how the markets perform and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances and does not take into account the situation where we are not able to pay you.** The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you may get back.

What happens if the MC Square S.A. is unable to pay out?

You may face a financial loss if the Fund is unable to return your investment due to poor performance. The Manager and the Manufacturer of this product have no obligation itself to pay out since the product design does not contemplate any such payment being made. Any loss you do suffer as a result of actions of the Manager or the Fund is not covered by an investor compensation or a guarantee scheme.

What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does (where applicable). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested minus the total costs (0 (€)), which has an annual cost impact of 0%.

Composition of costs

The table below shows:

- the annual impact of different types of costs on the investment return you may receive at the end of the recommended holding period
- the meaning of the different cost categories.

Impact on return per year for the Recommended Holding Period			
One-off costs annualised over 5 years	Entry costs	3.00%	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	Exit costs	3.00%	The impact of the cost of exiting your investment at maturity, which is 3% if you exit during the first 12 months.
Transactional costs	Portfolio transaction costs	0%	The impact of the costs of the Fund buying and selling underlying investments for the product.
	Other ongoing costs	0%	The impact of other costs which may be incurred, including the management fees paid to the Manager.
Incidental costs	Performance fees	0%	The Sub-Fund's performance is measured quarterly by its Net Asset Value increase. Performance Periods occur every three months. A Share Class Performance Fee of 15% applies to NAV growth during each Performance Period exceeding the High-Water Mark. The High-Water Mark is the highest NAV, ensuring fees only when losses are recovered. Fees are calculated daily, paid quarterly to the Manager.
	Carried Interest	0%	The impact of carried interest. The Fund does not charge Carried Interest.

How long should I hold it and can I take money out early?

The product has a "Recommended Holding Period of 5 years." After the Initial Offering Period, valuation occurs on the last day of each month (or the previous Business Day if not a Business Day). Net Asset Value per Share is calculated within eight (8) Business Days. You can redeem your shares on a Redemption Day, which is 90 calendar days before the Valuation Day at 4:00 p.m. (CET). Redemption can be made on each Redemption Day, with the redemption price equal to Net Asset Value at the relevant Valuation Day. The Fund will pay the redemption price within a reasonable period, possibly in kind based on liquidity constraints.

How can I complain?
